

# Modern Light Façade

## Citadel UPVC Fins

- Citadel introduces UPVC Fins and Elliptical Louvers as an extremely efficient and aesthetic screening system for building exteriors. Fins represent new Urbanism. They lend a sleek and modern look to structures .
- Citadel offers UPVC sections which are precisely designed and manufactured by making use of high quality plasticized polyvinyl chloride and innovative technique as per the set quality standard.
- UPVC louvers are now being used as an alternative for fins made out of aluminium and other materials.

### Applications of UPVC Fins:

- Duct Covering
- Elevations
- Gates
- Windows
- Balcony Railing sunscreen

### Why UPVC Fins:

- High Durability
- Energy Saver
- Thermal Insulator
- Corrosion Resistance
- Low Maintenance
- Great Contribution to aesthetics
- All weather proof
- Wind Resistance
- Eco Friendly
